# Maths

## 1-Exploring Shapes and Space

### Tessellation Creation:

Understand the concept of tessellation (tiling a plane with repeating geometric shapes without gaps or overlaps).

Choose one regular polygon (triangle, square, hexagon) and create a tessellation pattern using it in your notebook. Be creative with coloring and design.

Research if other regular polygons can tessellate. Write down your findings.

### 2-3D Shape Hunt:

Identify at least five objects around your house that resemble different 3D shapes (cube, cuboid, cylinder, cone, sphere).

For each object, note down its name and draw a rough sketch.

Try to identify the number of faces, edges, and vertices for the cube and cuboid you found.

### 3-Map Making and Scale:

Draw a rough map of your house or a single room in your house.

Choose a suitable scale (e.g., 1 cm = 1 meter or 1 cm = 0.5 meter).

Indicate the scale you have used on your map.

## 4- Data Handling and Interpretation

### Data Collection and Pie Chart:

Survey at least 10 people (family members or friends) about their favorite type of music (e.g., pop, classical, rock, Bollywood, folk).

Organize your data in a frequency table.

Calculate the central angle for each type of music to represent it in a pie chart.

Draw a neat pie chart to represent the data.

### 5-Probability Experiment:

Take a standard six-sided die. Roll it 20 times and record the outcome of each roll.

Create a frequency table showing how many times each number (1 to 6) appeared.

Based on your experiment, find the experimental probability of getting:

A prime number, An even number

The number 4.

## English

1. Prepare a project work on file pages on the conversion pattern of REPORTED SPEECH from DIRECT to INDIRECT for all types of sentences in detail with examples.
